

CORE150

This built-in speaker is one of the most indispensable elements of the Artcore system. You can find out how this system works on the previous pages.

The CORE150 is an active built-in speaker that comes from the well-known Intimi line. With a frameless grill of barely 1 mm and a thickness of just under 5 mm, it makes quick work of today's standards. The titanium driver with neodymium magnet and patented® suspension, together with the advanced separation filter, create a magnificent sound experience. The CORE150 is driven by a double amplifier: 20 W (tweeter) + 70 W (woofer).

Not only is the CORE150 active, you can also use it both wired and wirelessly. In both cases, you control it via the Artcore app. This forms the dashboard with services such as Spotify, Vtuner, etc. This allows you to effortlessly create a flexible multi-room system.

- ① Directable tweeter.
- ② Wired or wireless integration in the network.
- ③ Front plate and basket made from one piece, including aluminium grille with magnet system.
- ④ Included power adapter.

TECHNICAL SPECIFICATIONS

range	<50 m ²
system	2-way coaxial
woofer	6" neodymium
tweeter	1" directable neodymium titanium dome
input	2 Gigabit ethernet (built-in switch)
power	20 + 70W
frequency range	55Hz - 19,5kHz
power supply	24V - 120W DC
dim. cut-out (Ø)	210mm
dim. (Ø x d)	235 x 100mm
weight / piece	1,9kg
composition	ABS / metal grill
colour	white
features	paintable grill
options	acoustic kit (KITR03) flush mount kit (FLKITR02060)
