

FL620

This built-in speaker is flatter and more invisible than any of its predecessors. The frame has been reduced down to 1 millimetre, but still scores high when it comes to vibration absorption. The grille of the speaker is extremely fine-tuned and feels almost like silk. The sound is accurate, warm and carries far. A no-bones-about-it speaker.

Want to give a party that doesn't attract too much attention? The FL620 lets you feel the vibrations!

TECHNICAL SPECIFICATIONS

range	<50m²
system	2-way coaxial
woofer	6,5" polypropylene carbon
tweeter	0,5" polycarbonate
amp power	20 - 120W (recommended)
sensitivity	90dB
impedance	8Ω
frequency range	70Hz - 20kHz
dimensions cut-out (Ø)	205mm
dimensions (Ø x d)	230 x 75mm
weight / piece	1,20kg
composition	ABS / metal grill
colour	white
features	paintable grill
options	acoustic kit (KITR03)
