

PR-4120

4-CHANNEL 100V POWER AMPLIFIER

This power amplifier is the smaller version of the PR-4240. It will supply plenty of power to your zones, enabling you to supply a maximum of four zones with 120W. You can control the amplification separately for each zone or channel.

A bank has its own zones too: a reception area, meeting rooms, etc. 4 x 120W is more than sufficient to provide music, as well as a PA system, in each of the zones.

output capacity 100V	4 x 120W
output capacity RMS 8Ω	monitor
frequency range	50Hz - 16kHz
zones	4
direct output	70V / 100V / 4Ω
LED level indicator	yes
safety	over-voltage and power surges
cooling	automatic ventilator / thermal sensor
power supply	240V AC
power consumption	720W
dimensions (h x w x d)	88 x 484 x 353mm
weight	22kg
